Technical Skills

Programming Languages : C#, JavaScript, TypeScript, Java, C++

Frameworks & Libraries: .NET Core, ASP.NET, Entity Framework, LINQ, Angular, Bootstrap, .NET Framework, jQuery

Databases : SQL Server, MySQL

Cloud & DevOps: Microsoft Azure, Kubernetes (AKS), Terraform, Bicep, Azure DevOps, FinOps, Git

IAM & Security : Identity & Access Management, OIDC, OAuth2

AI & Productivity : GitHub Copilot, Generative AI, Augmented Engineering, Spec-Driven Development / SDD (OpenSpec, spec-kit by GitHub)

Tools & Others : Visual Studio Code, Visual Studio, YAML, Power BI

Languages

Spanish — Native

English — Professional

Professional Summary

With **12+ years of experience** in the Microsoft ecosystem, I specialize in designing and operating mission-critical systems where security and scalability are paramount. Currently, I am a key member of the **Identity and Access Management (IAM)** team at Visma (Youforce), managing identity and access governance for high-complexity HCM solutions across Europe.

My value proposition bridges the gap between deep **.NET Core** development and modern **Azure** infrastructure. I am a strong advocate for **"Augmented Engineering"**: I leverage GitHub Copilot to automate over 90% of code generation, allowing me to focus my expertise on high-level architecture, security hardening, and critical quality assurance.

Core Areas of Expertise:

- **Identity & Access Management (IAM)**: Designing secure architectures and authentication protocols (OIDC/OAuth2) within highly regulated industries.
- **Cloud & Infrastructure as Code (IaC)**: Deploying and scaling microservices using Kubernetes (AKS), Terraform, and Bicep within robust CI/CD frameworks.
- **FinOps**: Driving cloud cost optimization and operational efficiency in high-availability environments.

- **AI-Driven Development & Spec-Driven Development (SDD):** Streamlining the SDLC through the strategic integration of Generative AI, OpenSpec, and spec-kit (GitHub).

Throughout my career at organizations such as Hiberus and Visma, I have successfully led the transformation of legacy systems into modern cloud architectures, always maintaining a sharp focus on business results and cost-efficiency.

Professional Experience

Senior Software Engineer | IAM & Cloud Infrastructure

Aug. 2021 - Present

Visma

As a member of the Identity and Access Management (IAM) team for Youforce, I focus on the technical development and operational excellence of identity systems supporting large-scale HCM solutions. I leverage an "Augmented Engineering" approach, utilizing AI-driven tools to maximize delivery speed without compromising security or architectural integrity.

- **Microservices Development:** Designing and implementing business logic and identity services using .NET Core, ensuring high-performance, scalable, and robust APIs within the Youforce ecosystem.
- **AI-Assisted Development (GitHub Copilot):** Expert in AI-driven workflows, utilizing Copilot for code generation (90%+) while acting as a critical reviewer to ensure all AI-generated output meets corporate security, compliance, and performance standards.
- **Infrastructure & Automation:** Provisioning and maintaining Microsoft Azure resources using Terraform and Bicep. Managing operational deployments on Kubernetes (AKS) and streamlining CI/CD pipelines.
- **Security & Cost Management:** Implementing FinOps best practices to optimize cloud consumption and ensuring that all IAM implementations adhere to strict security protocols in highly regulated environments.

Tech: .NET Core, IAM, Kubernetes (AKS), Microsoft Azure, Terraform, Bicep, GitHub Copilot, Azure DevOps

Senior Software Analyst | Insurance Aggregation & Financial Interoperability

May 2019 - Aug. 2021

Ibercaja

Led the development and maintenance of the core insurance brokerage platform, focusing on third-party data integration and bank customer portfolio management.

- **Third-Party Data Aggregation:** Engineered automated workflows to fetch and normalize policy data from multiple external insurance providers, ensuring high data integrity within the bank's core systems.
- **Premium Calculation Engine:** Developed business logic to calculate and validate customer premiums, ensuring mathematical accuracy and regulatory compliance for bank-mediated insurance products.
- **B2B System Integration:** Streamlined data exchange between the bank and external partners, managing complex ETL processes and integrations to improve operational efficiency.

Tech: .NET Framework, C#, ASP.NET, SQL Server, Entity Framework

Senior Software Analyst | Mission-Critical Compliance & Core Systems

Mar. 2017 - May 2019

Hiberus Tecnología

- **Vueling (Crew Management & Regulatory Compliance):** Developed the core management panel for Cabin Crew flight rotations. Engineered complex rule engines to enforce Aviation Regulatory Compliance (flight time limitations), ensuring operational safety and preventing legal/regulatory infractions for the airline.
- **Ibercaja Seguros (Life Insurance):** Led the analysis and development of the core premium calculation engine, translating actuarial logic into high-precision financial software.
- **Full-Stack Engineering:** Leveraged the .NET ecosystem and Angular to build high-availability tools for sectors where data accuracy and regulatory adherence are non-negotiable.

Tech: Angular, ASP.NET, C#, Entity Framework, SQL Server

Senior Software Engineer

Oct. 2016 - Mar. 2017

Tecnocom

- **Legacy Architecture (VB6 / COM+):** Managed and optimized mission-critical business logic using COM+ components and Visual Basic 6.
- **Rich UI Development (Silverlight/WPF):** Developed interactive data-driven dashboards using Silverlight and XAML-based architectures.

Tech: WPF, Silverlight, VB6, COM+, ASP Classic

Desktop Application Developer (Microsoft Technologies)

May 2015 - Oct. 2016

Hiberus Tecnología

Full-lifecycle development of Windows-based desktop ERP software.

Tech: Windows Forms, VB.NET, SQL Server, .NET Framework

Web Application Developer

Mar. 2014 - Oct. 2016

Hiberus Tecnología

Engineering scalable web applications leveraging the Microsoft stack (ASP.NET, ADO.NET) and responsive UI frameworks.

- Web ERP development for sales order management
- Custom CRM with real-time data synchronization
- Management systems for Provincial Council of Zaragoza

Tech: ASP.NET, Bootstrap, jQuery, SQL Server, ADO.NET

Junior Software Developer (Internship)

Sep. 2013 - Feb. 2014

Hiberus Tecnología

Developed and maintained applications using the .NET stack

Tech: .NET Framework, VB.NET, SQL Server

Education

Microsoft Certified: Azure Fundamentals

2023

Microsoft

Certification in Microsoft Azure fundamentals, cloud services and implementation best practices. **View credential** (<https://learn.microsoft.com/api/credentials/share/en-us/DanielJordnSisamn-7625/3EFE8CE17E1A27FB?sharingId>)

B.S. + M.S. in Computer Engineering

2007 - 2014

Universidad de Zaragoza

Specialization in Computer Architecture and Technology, Computer Science and Artificial Intelligence, Systems Engineering and Automatic Control, Languages and Computer Systems. Average grade: 6.7. Honors in Operating Systems I (2010).
