Technical Skills

PROGRAMMING LANGUAGES

C#, JavaScript, TypeScript, Java, C++

FRAMEWORKS & LIBRARIES

.NET Core, ASP.NET, Entity Framework, LINQ, Angular, Bootstrap, .NET Framework, jQuery

DATABASES

SQL Server, MySQL

CLOUD & DEVOPS

Microsoft Azure, Kubernetes (AKS), Terraform, Bicep, Azure DevOps, FinOps, Git

IAM & SECURITY

Identity & Access Management, OIDC, OAuth2

Professional Summary

With **12+ years of experience** in the Microsoft ecosystem, I specialize in designing and operating mission-critical systems where security and scalability are paramount. Currently, I am a key member of the **Identity and Access Management (IAM)** team at Visma (Youforce), managing identity and access governance for high-complexity HCM solutions across Europe.

My value proposition bridges the gap between deep **.NET Core** development and modern **Azure** infrastructure. I am a strong advocate for **"Augmented Engineering"**: I leverage GitHub Copilot to automate over 90% of code generation, allowing me to focus my expertise on high-level architecture, security hardening, and critical quality assurance.

Core Areas of Expertise:

- **Identity & Access Management (IAM):** Designing secure architectures and authentication protocols (OIDC/OAuth2) within highly regulated industries.
- **Cloud & Infrastructure as Code (IaC):** Deploying and scaling microservices using Kubernetes (AKS), Terraform, and Bicep within robust CI/CD frameworks.
- **FinOps:** Driving cloud cost optimization and operational efficiency in high-availability environments.
- **AI-Driven Development & Spec-Driven Development (SDD):** Streamlining the SDLC

AI & PRODUCTIVITY

GitHub Copilot, Generative AI, Augmented Engineering, Spec-Driven Development / SDD (OpenSpec, spec-kit by GitHub)

TOOLS & OTHERS

Visual Studio Code, Visual Studio, YAML, Power BI

Languages

Spanish	NATIVE
English	PROFESSIONAL

through the strategic integration of Generative AI, OpenSpec, and spec-kit (GitHub).

Throughout my career at organizations such as Hiberus and Visma, I have successfully led the transformation of legacy systems into modern cloud architectures, always maintaining a sharp focus on business results and cost-efficiency.

Professional Experience

Senior Software Engineer | IAM & Cloud Infrastructure

Aug. 2021 - Present

Visma

As a member of the Identity and Access Management (IAM) team for Youforce, I focus on the technical development and operational excellence of identity systems supporting large-scale HCM solutions. I leverage an "Augmented Engineering" approach, utilizing AI-driven tools to maximize delivery speed without compromising security or architectural integrity.

- **Microservices Development:** Designed and built business logic and identity services on .NET Core, shipping high-performance, scalable APIs within the Youforce ecosystem.
- **AI-Assisted Development:** Drove an AI-first workflow with GitHub Copilot, generating 90%+ of new code while owning critical review for security, compliance and performance.
- **Infrastructure & Automation:** Operate 27 microservices across 4 AKS environments (dev/test/acc/prod), provisioned via Terraform and Bicep with fully automated CI/CD pipelines.
- **Security & Cost Management:** Applied FinOps practices to cut cloud spend while keeping IAM workloads compliant with strict security protocols in highly regulated environments.

**Senior Software
Analyst | Insurance
Aggregation &
Financial
Interoperability**

May 2019 - Aug. 2021

Ibercaja

- Directed the technical development of the core insurance brokerage platform — sole developer — processing thousands of policies/day across up to 10 insurance and reinsurance carriers, covering premium calculation, third-party data aggregation and B2B integrations under strict regulatory compliance.

.NET Framework

C#

ASP.NET

Entity Framework

WPF (Windows Forms)

Senior Software Analyst | Mission-Critical Compliance & Core Systems

Mar. 2017 - May 2019

Hiberus Tecnología

- **Vueling (fleet-wide Crew Management):** Built the airline's cabin-crew rotations panel over ~1 year with a 5-developer team, powering daily rotation planning across the full operation and enforcing EASA flight-time-limitation compliance to prevent regulatory infractions.
- **Ibercaja Seguros (Life Insurance):** Spearheaded the analysis and development of the core premium calculation engine, translating actuarial logic into high-precision financial software.
- **Full-Stack Engineering:** Leveraged the .NET ecosystem and Angular to build high-availability tools for sectors where data accuracy and regulatory adherence are non-negotiable.

Senior Software Engineer

Oct. 2016 - Mar. 2017

Tecnocom

- **Legacy Architecture (VB6 / COM+ / ASP Classic):** Maintained mission-critical business logic on a client's legacy VB6 + COM+ + ASP Classic platform, supporting day-to-day operations during a ~2-month period.
- **Banco Sabadell (internal banking application):** Built Silverlight/WPF screens for the bank's internal banking application as part of a 2-person team during a ~3-month engagement, owning end-to-end delivery of production features.

WPF

ASP Classic

Software Developer

Sep. 2013 - Oct. 2016

Hiberus Tecnología

- Delivered full-lifecycle Windows desktop ERP and web applications across the Microsoft stack (ASP.NET, ADO.NET, WinForms, VB.NET, SQL Server).
- Shipped a sales-order ERP, a real-time-sync custom CRM, and management systems for the Provincial Council of Zaragoza, progressing from internship to senior developer responsibilities.

Education

Microsoft Certified: Azure Fundamentals

2023

[Microsoft](#)

Certification in Microsoft Azure fundamentals, cloud services and implementation best practices.

[View credential](#)

B.S. + M.S. in Computer Engineering

2007 - 2014

[Universidad de Zaragoza](#)

Specialization in Computer Architecture and Technology, Computer Science and Artificial Intelligence, Systems Engineering and Automatic Control, Languages and Computer Systems.

Average grade: 6.7. Honors in Operating Systems I (2010).
